

Revised Behavior Problem Checklist (RBPC) Now available in PEI OMA

This new version of the PEI OMA adds the Revised Behavior Problem Checklist (RBPC) which is now associated to Brief Strategic Family Therapy (BSFT), Multidimensional Family Therapy (MDFT), and the Strengthening Families Program (SFP). One new feature is the ability to choose one of two respondents for the RBPC. The system will display two copies of the RBPC questionnaires (RBPC – Parent and RBPC – Teacher), but only one can be entered. Once the scores are entered and saved for an RBPC questionnaire, the alternative RBPC questionnaire will be hidden for the life of that treatment cycle.

New Clients will show both Parent and Teacher Questionnaires:

Required Questionnaires	
New	Questionnaire Name
	Youth Outcome Questionnaire - 2.01 (Parent)
	Youth Outcome Questionnaire - Self Report - 2.0
	Revised Behavior Problem Checklist (RBPC) - Parent
	Revised Behavior Problem Checklist (RBPC) - Teacher

At this point, you can choose either Parent OR Teacher

Once the user has completed one or the other (Parent or Teacher), it will be the only choice possible for the rest of the Treatment Cycle.

Required Questionnaires	Completed Questionnaires
New	Questionnaire Name
	<input checked="" type="checkbox"/> Revised Behavior Problem Checklist (RBPC) - Parent

Now that a "Parent" Questionnaire is done, Teacher is not an option

If in the future (for Updates and/or Post Questionnaires), the Parent is no longer available, please choose "Unable to Collect" and an appropriate reason.
